

Human Resources

Benefits

Automate Onboarding & Training

Set one time or recurring course assignments for individuals or groups. Automatic reminders ensure training gets completed.

Easy to Create, Deploy and Track

Leverage your existing content and easily add new courses to bring all your training components under one umbrella. Intuitive dashboards make deploying and managing courses easy.

Let Employees Help Themselves

Develop your workforce with continuing education in a self-service course library. Learners can access assigned and elected courses, as well as their course history and certifications.

Central Source of Truth

Use ServiceNow as a central source to deploy, manage and track mandated training for SOX, HIPAA, PCI, SOC, etc.

Maximize Training Budgets

Utilize every training dollar with increased transparency & manager approvals. Get great functionality without adding yet another complex (and costly) system or custom integration.

Harnessing the Power of ServiceNow

The traditional Learning Management System (LMS) is a beast. It is time and resource intensive - and universally hated for its poor user experience and inaccessibility. Trapped in its own proprietary world, the LMS suffers inattention and disrepair, while still costing an arm and a leg.

PlatCore has tapped the Now Platform™ to transform the traditional LMS. Built in ServiceNow, PlatCore's training can seamlessly:

- utilize employee data,
- save training history on the employee record,
- automate on-boarding, recurring training, reminders & followup,
- provide world-class reporting and security, and
- motivate adoption through the affinity (and cost savings) of a known system.

A Modern User Experience

PlatCore was built to beautifully meet the needs of Employees, HR staff, Managers, and Administrators. Our system provides a modern, intuitive interface that aims to improve satisfaction, engagement, and productivity.

PlatCore's LMS can be deployed and configured for your instance in **under one hour** through the ServiceNow App Store!

Learning Management

SIMPLIFIED.

Features

Powered by ServiceNow

Integrates with existing ServiceNow modules or use as a standalone application.

Create Courses

Deliver courses, quizzes, & media with limitless content formats. (SCORM, Video, SharePoint, & more.)

Course Assignment

Create assignments for individuals or groups in seconds.

Track Training History

Track progress against learning goals by user, course, assignment, or group.

Certification Management

Track certifications across the enterprise, who holds them, and when they expire.

Modern User Interface

Offers a modern, brandable, intuitive experience on a platform that users already know and love.

Keep an Audit Trail

Maintain historical training data for management and auditors on what training has occurred, and when.

Mobile Ready

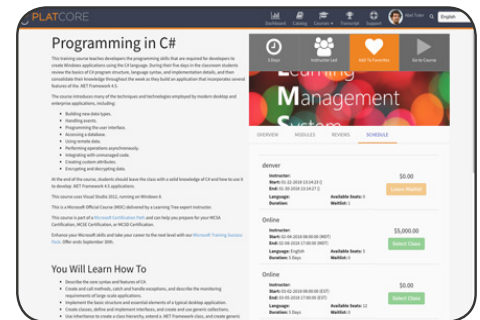

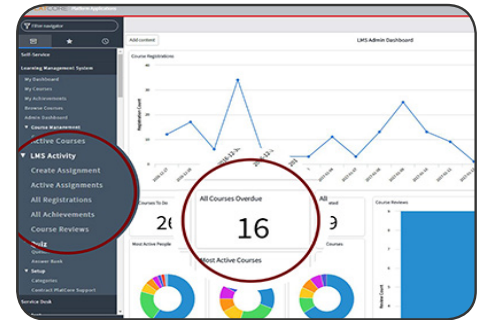

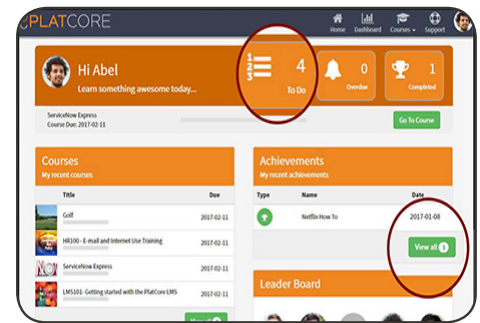

Learners can access training anytime - on any device.

Rich Reporting

Provide organizational reports to track learning progress, training spend, and compliance.

User Notifications

Provide notifications for assignments, reminders, approvals, pre-requisites, expiring certifications, and more.
