PLATCORE

Governance, Risk & Compliance

Benefits

Central Source of Truth

Use ServiceNow as a central source to deploy, manage and track mandated training for SOX, HIPAA, PCI, SOC, etc.

Reduce Risk with an Audit Trail

Simplify your training control audits. Combined with the GRC module, you can complete 10-minute training audits – really!

Easily Create or Import Trainings

Create courses from your own content or use our standards-based (SCORM 1.2/ 2004) support to access thousands of prebuilt courses.

Automate Followup and Tracking

Provide automatic notifications and reminders for users, managers, and approvers. Tracking & reporting are easy with PlatCore's intuitive administrator dashboards.

Maximize Training Budgets

Utilize every training dollar with increased transparency & manager approvals. Get great functionality without another complex (and costly) system or custom integration.

Smarter Governance Risk and Compliance

We face some of the largest regulatory changes in a generation - coupled with an unprecedented pace of innovation. Forward-thinking companies are addressing these challenges by answering tough questions, such as:

- How can we ensure training compliance for GDPR to reduce the risk of debilitating fines?
- How can we effectively communicate organizational change?
- Are users actaully completing critical training?
- **Rather than our annual fire drill**, could we have a central location to track repetitive training, such as SOX, HIPAA, PCI, SOC, etc?

In the past, you may have answered some of these questions with another onerous task – that of managing an LMS. This presents yet another set of challenges. They are often time and resource intensive - hated for a poor user experience and inaccessibility, while still costing an arm and a leg.

Using ServiceNow to Transform the LMS

Built in ServiceNow, PlatCore can seamlessly automate your training needs with world-class reporting and security. Did we mention you can create audit reports in minutes – **without a single fire drill?**

PlatCore's LMS can be deployed and configured for your instance in **under one hour** through the ServiceNow App Store!
