

Benefits

System Consolidation

- A known system for IT, admin & users means a lightning-fast TTV and lower overall TCO.
- Eliminate siloed data, complex integrations, security vulnerabilities & logins.
- Leverage the Now Platform's rapid development capabilities & infinite scalability.

Modern Consumer Experience

- Use an innovative training platform to attract & retain top talent, starting with HR Onboarding.
- Allow staff to take training anytime, anywhere with an intuitive mobile interface.
- Use internal workforce development to reduce staff turnover. Facilitate access to ongoing education.

Automate your Training Process

- Automate course assignment, approvals & notifications for better, repeatable experiences.
- Increase the transparency of your training activities with customized dashboards and real time data.
- Centralize training and certification data for easy reporting and audits. Access your training data in ServiceNow HR and GRC modules.

Faster, Cheaper and With Fewer Resources

In today's business environment, companies are constantly challenged to do things faster, cheaper, and with fewer resources. In addition, there are inevitable business threats and regulations that require workforce training.

Traditionally, Learning Management Systems (LMS) combat these obstacles, but now you must manage yet another system, learn a new interface, and build custom integrations to manage data. These systems are resource intensive and add complexity to your already sprawling application landscape.

Learning Management at the Speed of NOW!

PlatCore simplifies and automates the traditional LMS. This revolutionary LMS software is built on the industry-leading Now Platform™ from ServiceNow.

Leverage learning records within other ServiceNow applications such as HR, GRC, ITSM, and CSM. By consolidating to one platform, you reduce support and management costs and provide a consistent interface for employees.

PlatCore's LMS can be deployed and configured for your instance in under one hour through the ServiceNow application store!

Learning Management SIMPLIFIED.

Features

Powered by ServiceNow

Integrates with existing ServiceNow modules or available as a standalone application (OEM).

Create Courses

Deliver courses, quizzes, and media with limitless content formats. (SCORM, Video, SharePoint, and more.)

Course Assignment

Create assignments for groups or individuals in seconds.

Self-Service Training Library

Centralize your training catalog where users can sign up for courses and access their transcripts.

Certification Management

Track certifications across the enterprise, who holds them, and when they expire.

Modern User Interface

Use a modern, brandable, intuitive experience on a platform that users already know and love.

Keep an Audit Trail

Maintain historical training data for management and auditors on what training occurred, & when.

Mobile Ready

Allow learners to access training anytime, on any device.

Rich Reporting

Provide organizational reports to track learning progress, training spend, and compliance.

User Notifications

Provide notifications for assignments, reminders, approvals, prerequisites, expiring certifications, and more.
