

# Native ServiceNow Learning Management

PlatCore LMS, a Native ServiceNow Application, provides unmatched power and flexibility to meet your dynamic business needs. By harnessing your existing data and processes in addition to ServiceNow's exceptional security, adaptability, reporting, and scalability, training can be implemented with **unparalleled ease and efficiency**.

Trusted by enterprise companies serving 100 to over 50,000 learners, the PlatCore LMS allows you to deliver training directly from your ServiceNow instance, enhancing the learning experience and enabling better learning outcomes.

You already have ServiceNow - **all you have to do is turn on the PlatCore LMS!**

## What makes PlatCore different?

### Consolidate Systems

Deliver employee training from ServiceNow's platform for reduced risk and an incredible time to value. Centralize training to break down silos, improve data integrity & reporting.

### Automate Processes

Create training workflows and actions across your entire company. Focus on creating great training experiences and spend less time on tedious, repetitive administrative work.

### Learner Focused

Unify your training materials (including third party courses, SCORM, XAPI, AICC, Video, MSDocs, PDF and more) in our modern learner portal for consistently great experiences.

*PlatCore LMS, and its integration with ServiceNow, has allowed us to do things we wouldn't have been able to do with any other LMS vendor. **PlatCore is so much more than a typical LMS!***

*PlatCore is very easy to use and create learning courses. It's configurable and flexible - you can enable staff, vendors & partners all at once. **This is a must-have for any ServiceNow company.***

# Features enterprise customers love.

A Native Application, PlatCore harnesses ServiceNow's power and data at scale to perform actions beyond typical learning management.

Here's how we measure up:

## ✔ Simplified Learner Experience

Provide the exact training employees, customers, or vendors need, when and where they need it, improving engagement and adoption rates.

## ✔ Easier Implementation

Leverage your existing ServiceNow platform to cut the typical LMS implementation time in half and greatly reduce total cost of ownership.

## ✔ Data Security and Compliance

Deliver training directly from your existing ServiceNow instance – even in a FedRAMP, cloud-based or on-premise solution.

## ✔ Quickly Create and Deliver Courses

Rapidly build new courses and import your existing content with limitless content types (including SCORM, XAPI, AICC, video, MSDocs, PDF and more.)

## ✔ Unlimited Data and Reporting

Customize real-time reports and dashboards to track learning progress, training spend, and monitor compliance.

## ✔ Support for Different Training Types

Create a centralized learning center with any self-paced, e-learning, instructor-led, learning plan, virtual classroom or 3rd party courses.

## ✔ Robust Documentation & Support

Our fantastic support team, video training series and extensive documentation have all been built to ensure your success.
