

PlatCore LMS

10X Your Training Delivery

Learning should not be done in a silo. Traditional LMS platforms increase complexity, risk, and cost. PlatCore changes that.

As the only AI-powered LMS built natively on ServiceNow, we help our customers drive revenue, decrease costs, and manage risk.

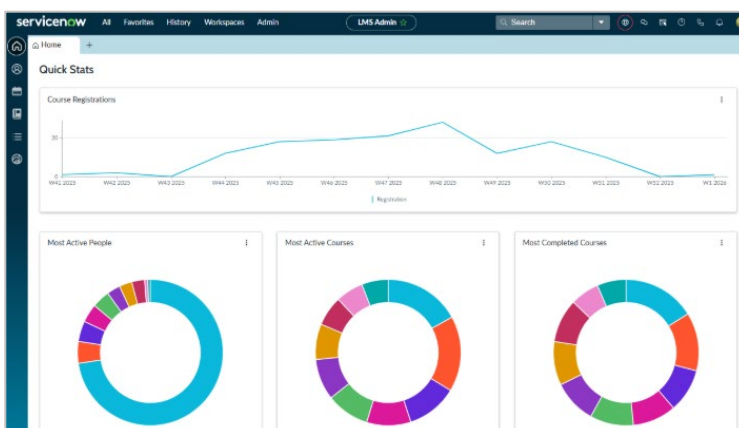

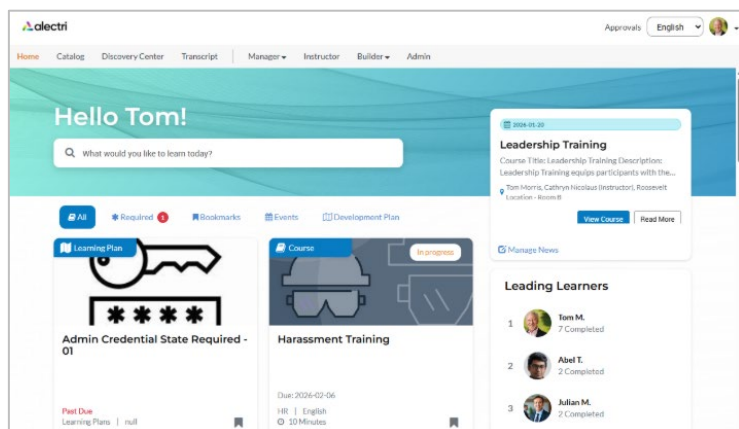

Scale training for any audience

Close the loop between HRSD and on-the-job training:

- Onboarding & Role Change: Trigger learning automatically based on events.
- Skills & Career Development: Deliver the actual training, tying skills to action.
- Simplified Tech Stack: Lower total cost of ownership, fewer integration blockers

Transform CSM into an engine for customer, partner, and reseller training:

- Customer Training Portals: Educate users, reduce support, and boost adoption
- Partner / Reseller Enablement: Ensure channel readiness and track compliance
- Secure Access & Tracking: No external LMS or additional user management required.

**Built on ServiceNow
Solution**

Benefits

Automate

Eliminate time-consuming error-prone work

Accelerate

Fast, efficient deployment and time-to-value

Personalize

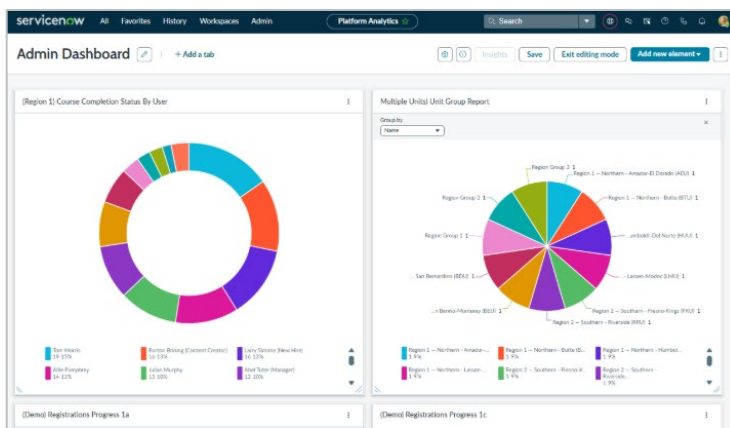

Learning based on real-time data.

Consolidate

Reduce cost & complexity

Achieve Federal Agencies' mission to reduce cost & streamline training:

- Million-dollar savings through system consolidation and reduced complexity
- Hundreds of hours saved with automation of assignments and elimination of manual tasks
- Stronger compliance and audit readiness with real-time reporting, certifications, and version control
- Improved user experience with a modern, centralized learner portal integrated directly into daily workflows

**Real Results:**

Customers using PlatCore on ServiceNow have reported :

- **83% reduction** in Total Cost of Ownership
- **30–40% higher adoption** with contextual, role-based learning
- **4–5x faster time to value** vs. third-party LMS platforms

Next steps

Contact PlatCore today at sales@platcore.com to discuss how we can help your organization **10x your training delivery**.

Before PlatCore, training was fragmented across multiple systems and spreadsheets. Now, everything lives inside ServiceNow — automated, connected, and effortless to manage.
