## **PlatCore Achieves ServiceNow Technology Partner Silver Tier Status**

**(Denver, CO)**- PlatCore, the leading Learning Management System built in ServiceNow, announced today it has achieved Silver Tier status in the ServiceNow Technology Partner Program. PlatCore joins exclusive Silver Tier ISV partners that have met the customer adoption requirements for a Now® Certified application in the ServiceNow Store. PlatCore serves clients in agriculture, government, banking & finance, food & beverage, healthcare, manufacturing, and technology.

[PlatCore LMS](#) features a modern, user-friendly learner interface, powerful administrator controls, real-time data and the world-class reporting and security of ServiceNow. PlatCore customers have found an unparalleled ease of use as well as massive cost savings and process efficiencies as compared to homegrown or external/3rd party LMS. For ServiceNow HR customers, PlatCore LMS enables HR to deliver native training and workforce compliance as part of the onboarding workflow.

Novelis, a PlatCore customer, has seen exponential cost savings. Within just one week, the world's largest aluminum recycler had a modern LMS that was supporting 1,279 users in 31 locations, 10 countries and 4 continents. According to Stephanie Padilla, Training Process Owner with Novelis R & D, "Now, the data we need is at our fingertips immediately, where it used to take hours or month of combing through emails and paper files. And when audit time comes, it's as easy as point, click and print."

"The PlatCore LMS has rapidly addressed a high impact use case for ServiceNow customers," said Avanish Sahai, Global Vice President ISV, Industry and Technology Alliances at ServiceNow. "We are excited to welcome them to the Silver Tier partner status and expect this rising venture to continue to offer great value to our customer base."

Says PlatCore CEO Jon Becker, "Achieving Silver partner status is an exciting step for our team. It reaffirms that we are building an innovative product that complements ServiceNow and solves an important problem for our clients."

##
