

ServiceNow Application Developer Position

Role Brief

PlatCore is seeking a ServiceNow Application Developer to play a fundamental role in product delivery and delivering consistent value to our clients. As a PlatCore developer, you will be responsible for architecture design, development of our innovative products, and implementing internal best practices within our product team. PlatCore is experiencing explosive growth and offers numerous perks and benefits. We are seeking bold thinkers who want to be a part of our continuing journey.

Responsibilities

- Perform all aspects of platform administration, design, development and implementation of software solutions
- Develop and review architecture plans
- Collaborate across the organization to build fully integrated, scoped application solutions
- Work with clients to gather, document and understand business needs and requirements. Create functional prototypes that effectively address these needs
- Ability to learn new technologies quickly and complete complex projects, on time
- Create and maintain software documentation
- Troubleshoot and resolve varying levels of technical issues
- Manage Tier 2 support tickets
- Add value by being current with new trends and frameworks within the JavaScript and ServiceNow community

Requirements

- 2+ years development experience on the ServiceNow platform (Workflows, UI Policies, UI actions, script includes, import sets and transform maps) strongly preferred
- 5+ years of general application development experience
- In-depth knowledge of HTML5/CSS3/Bootstrap
- Experience with JavaScript, Angular JS, React, and REST APIs
- Strong organizational, written, and verbal skills to facilitate client interaction and task completion
- Strong problem diagnosis and creative problem-solving skills
- Thrive in a fast-paced environment, learn rapidly and master diverse technologies and techniques
- Experience with solution architecture including integration, security, data modeling, and reporting
- Knowledge of full SDLC and Agile development methodologies, application development life cycle, testing, performance tuning, and debugging
- Ability to work independently, remotely, and as part of a team. Must be U.S. based
- BS in Computer Science or related field.

Nice to Have:

- ServiceNow Certified Application Developer
- ServiceNow Certified System Administrator
- 1+ year of experience in Solution Consulting
- Experience in LMS software or Educational Technologies
- Experience with AWS/Azure services
- Experience in start-up environment
- Denver based preferred

About us

PlatCore is an early stage software company focused on products based on the ServiceNow platform. We are looking for those who want to be part of a thriving and growing company. We are passionate about having a culture worth protecting. Each team member plays a critical part in driving value for our clients, in current and future product, and sharing in the success of PlatCore.

We are passionate about our work, freakishly smart, curious, and each have something unique to offer, both professionally and personally. We are driven to make cool stuff that delivers huge value to our clients. If this describes you, we want to hear from you!
